**Game Review CMS**

# Week 01 Check-In

1. **What have you worked on regarding your passion project?**

   I have chosen to go with a ***Game Review CMS*** for my passion project. This week I have focused on the initial planning and design phase. I have defined some core concepts for the CMS, which will allow for displaying and managing the game reviews.
   I have outlined some potential database entities, including **games**, **users**, **platforms**, **reviews**.

2. **Are there any issues impacting your project timeline?**

   Currently, there are no major issues impacting my project timeline. I am in the early stages of planning and I aim to set up a basic project structure in the coming week. I also aim to define the initial database schema next week.
